

Add A Modern Touch To Your Space

V2024.1

We chose lighting due to the surprise of the immaterial, the multi-sensorial object that can become magical.

In 2003, we started our work with the production of professional cinema and photography equipment. We imagined a more fluid approach to design. A form of total creation from brief to market. We saw the world ever more connected and wanted to embrace positivity. We imagined products born from supernatural daydreams where everything is possible. But can we write our own story?

First, we had to distance ourselves from the stereotyped and repetitive methods in design, construction and production. Empowering our own independence. But who is going to trust us? What do we need to learn? How do we find the right artisans for our projects?

So we began as always by designing, but we needed a product that would unite our passion, both intuitive and rational.

ما نور را به دلیل شگفتی غیر مادی و چند حسی بودنش انتخاب کردیم، نوری که جادویی ست ...
